

Client Information Form

Homeopathic consultation is simpler when there is a complete picture of the individual's mental, emotional, and physical states of health. This includes symptoms that affect both physical sensations (what does it feel like) and function (how it impacts you and your health) and what aggravates each symptom.

In your opinion, what are the two most important health issues you would like to address:

1) *

2) *

Medical History:

Fill in the boxes below according to your current symptoms. Each box is for a different category. If a box is not applicable to you, you may leave the box blank.

Welcome to Sutton BioEnergetix. Are you looking for a natural and safe way of addressing your health issues? Does the word '*homeopathy*' sound new to you? What about '*Computerized Electro Dermal Screening*'? If so, I would like to help you. My name is Randy Sutton and I have been practicing alternative therapies for over 25 years. My office is in Jackson, NJ, but I also work remotely.

Because we are all individuals, we experience unique and complex health problems. No two people are alike. As a result, stronger, more advanced remedies are needed. This is where Computerized Electro Dermal Screening (CEDS) and Homeopathy come in. I have used these with great success. I can also provide you with guidance to complement your homeopathic formula such as herbs, supplements, emotional support, and diet. Homeopathy was founded in the late 1700's in Germany and is the second most widely used system of medicine in the world. Homeopathy is made of natural ingredients derived from plants, minerals, and other natural substances. The main principle behind homeopathy is the idea that "like cures like." That is, if a substance causes a symptom in a healthy person, giving the person a very small amount of the same substance may eliminate their symptoms. Homeopathic remedies do not simply "cover up" symptoms and ignore illnesses. They stimulate the body's ability to correct itself (also known as Homeostasis).

There are several factors that make homeopathics so useful. Homeopathy:

- is very effective
- has a high success rate
- is completely safe and can be taken by adults, children, babies, the elderly, and pets
- can be taken alongside other medications
- addresses the cause, not just the symptom
- is made from natural ingredients
- has no side effects
- is very affordable compared to medications
- has 155,000 remedies to choose from (CEDS)
- is non-toxic and drug free
- is easy to take
- is used by many in helping them to prevent disease

Computerized Electro Dermal Screening, (CEDS), is a detection device. It is a noninvasive method using acupuncture points and bio-feedback technology to help find imbalances. These imbalances can contribute to ill health and/or symptoms. CEDS measures electrical currents in the body (much like an EKG machine measures the electrical activity of the heart). It is a computerized analysis. This will reveal where the energy imbalances are. From this information, we will know which combination

remedy will improve your energy imbalance. Thanks to this advanced technology, we eliminate guess work. This has never been done since the beginning of homeopathy. What an advancement this is! Conventional medicine certainly has its place and is often essential. Many people, however, feel it is not very effective when it comes to prevention and helping the body heal itself. Doctors around the world have endorsed homeopathy. They have urged the medical community to take advantage of this form of treatment. Perhaps in time, this form of healing will become more familiar and accepted by our society.

Disclaimer and Signature:

By my signature below, I am confirming that Randy Sutton from Sutton BioEnergetix or any representative from this company has not directly or indirectly implied or stated that I stop any of my medications that have been prescribed by my physician. I am confirming that Sutton BioEnergetix makes no claims that the CEDS method used by them will diagnose, treat, prevent, or mitigate disease. This device uses an ohmmeter to measure energy balances or imbalances at points on the skin invoked when applying a radio frequency transmission, audio output, or light source to affect energy transfer or similar stimuli necessary to produce a measurable biofeedback response as measured through the CEDS. This method is not a substitute for medical examinations and/or diagnosis by a licensed physician. Sutton BioEnergetix does not prescribe medical treatment or pharmaceuticals, nor do they represent themselves as medical doctors. They have not discouraged me from seeing my medical doctor. I am also stating that I am not connected to any government or medical agency. If I am, I have made this fact known to Randy Sutton or a representative of Sutton BioEnergetix to disclose my intent. I recognize and confirm that I am personally responsible for my own health and safety.
